

QINEO StarT 502 Premium

MIG/MAG Pulsed arc welding power source up to 500 ampere for automated welding

Simply weld better with the QINEO StarT: The welding power source offers you an easy entry into the world of automated welding. Use the advantages of the four available CLOOS welding processes in addition to the standard processes. This allows you to start welding immediately – without a long parameter search. Benefit from numerous optional components and functions. This makes the QINEO StarT your individual power source - exactly as you need it for your automated welding tasks.

- High-quality components with optimum price/performance ratio and excellent welding characteristics
- Faster to the target with the preset parameters of four CLOOS welding processes
- Simple, quick and intuitive operation with the MasterPlus Compact operating module
- Prepared for many commonly used standard interfaces
- Modular design and extensive accessories for flexible application possibilities adapted to individual requirements

QINEO StarT 502 Premium

Technical Data

Construction form	External wire drive
Welding current	15 A - 500 A
Welding current 60% duty cycle	500 A / 39 V
Welding current 100% duty cycle	400 A
Open circuit voltage	78,7 V
Connection cable	4 x 6 mm ²
Mains protection/400V	32 A
Type of protection	IP 23
Insulation class	F
Type of cooling	F
Dimensions L/W/H (without wire)	805 x 348 x 498 mm
Weight (without wire drive)	56 kg

Application

Auto

Process

- MIG/MAG Single Wire pulse
- MIG/MAG Single Wire
- MIG Bracing
