

QIROX QRC-320-H

6-axis robot mechanics with classic wrist, 3,200 mm working envelope and a high base for floor mounting

The QIROX QRC-320-H is a six-axis articulated arm robot. The robot is mounted in upright position on the floor or directly at a robot positioner. The QIROX QRC-320-H has a classic wrist where welding torches, flame cutters and other working tools with a weight of up to 15 kg can be mounted. The integration of a changing tool on the wrist allows the application of more processes with a robot.

- All-rounder: Carries out many different task due to the use of a changing tool and a maximum payload of 15 kg at the wrist
- Processes: Takes over all MIG/MAG and TIG welding processes, optionally leads a laser sensor and carries out cutting tasks
- Flexibility: Modular design for tailor-made systems, perfectly adapted to individual production requirements
- Dynamics: High dynamics due to slim product design, low weight and ergonomic shapes
- Quality: Repeatability, long service life and maintenance intervals

QIROX QRC-320-H

Technical Data	
Series	WL
Design	Classic
Number of axes	6
Payload	15 kg
Working area	3200 mm
Mounting area	500x510
Robot weight	238 kg
